

A new dimension of care.

North Canyon Medical Center is the first facility in the Magic Valley offering 3D mammography.

Conventional mammograms provide doctors with a two-dimensional image of the three-dimensional breast. Overlapping layers of tissue can sometimes create unclear results, false alarms, or worse — cancer, being missed. A 3D mammogram provides your doctor with a series of dimensional, fine-detailed images, allowing the best evaluation of breast tissue layer-by-layer. For more information or to schedule an appointment, please call (208) 934-4433 Ext 1112.

3D mammography is vastly superior to conventional 2D mammography

- 
 Detects 41% more invasive breast cancers
- 
 Reduces false-positive recalls by up to 40%
- 
 Detects cancer 15 months earlier
